

ACU Health Clinics – Brisbane Paediatric Physiotherapy Clinic

Let's get ready to move for life.

Comprehensive assessment of movement development.

Customised treatment plan including games and activities to build motor skills.

Individual or group treatment sessions.

Education and support for families and carers.

Consultation and liaison with health care providers.

Movement in the first weeks, months and years of life is fundamental to healthy growth and development, and without age appropriate motor skills, infants and children are held back from having positive interactions with others and the world around them.

ACU Health Clinic's Paediatric Physiotherapy Clinic is here to support and find solutions for infants and children with movement difficulties and to help them thrive.

Services include:

- motor development assessment, monitoring and therapy for infants and children of all ages
- interventions to address infant head shape concerns
- tummy time tips
- assessment and intervention for sensory motor difficulties in infants, toddlers and preschoolers
- prep readiness programs for motor challenged preschoolers
- assessment of growth and lower limb alignment
- assessment and rehabilitation of musculoskeletal injury in childhood
- assessment and rehabilitation of cardiorespiratory disorders in childhood.

Making an appointment
